Education

Chandigarh University 2021 – 2025
Bachelor of Engineering in Computer Science & Engineering (CGPA: 8.21 / 10)
- **Relevant Coursework:** Data Structures and Algorithms (Java), Operating Systems, Computer Networks, Object Oriented Programming (C++,Java,Python), Software Engineering, System Designing.

BITS International School , Bhiwani May 2021
CBSE Class - XII 83%

Experience

DSP Coder – Seattle, WA Aug 2024 - Nov 2024
Software Engineer Intern, Remote
- Developed and maintained dynamic web pages using Next.js and Tailwind CSS for responsive and modern UI design. Integrated Zod for robust form validation and improved user input handling.
- Implemented a rich text editor and connected it to the back-end for dynamic content creation and editing. Built API routes and connected front-end with MongoDB to store and retrieve structured content.

Cognizant March 2025 – June 2025
Programmer Analyst Trainee, Kolkata, West Bengal
- Developed and maintained web applications using JSP and Servlets, implementing both back-end logic and front-end integration. Implemented user authentication and log-in functionality, managed session handling, and secure access control.

Planet Spark July 2025 – Present
Software Engineer, Gurugram, Haryana
- **Galaxy:** Contributed to a large-scale Ruby on Rails platform supporting lead management, CRM, payments, enrolments, teacher workflows, and operational processes.
- Integrated **XPay and PayGlocal payment gateways**, implementing API service layers, asynchronous payment-link generation, signed webhooks, and secure request/response handling.
- Strengthened payment workflows with **HMAC verification, transaction validation, idempotency, and database transactions** to prevent duplicate processing and maintain payment-state consistency.
- Built a **Teacher Lead Engagement** workflow with PostgreSQL row-level locking, lease-based ownership, automatic lead reclamation, interaction history, and incentive processing.
- Developed an **IoT biometric attendance pipeline** connecting a Python edge agent with Rails APIs and database ingestion, including deduplication, retry/backoff, connection recovery, and per-record error handling.
- Implemented enrolment payment verification and contributed to referral, target cost-per-class, dynamic presentation, data automation, production debugging, and Sentry issue resolution.

Projects

Do Not Book My Show | *React.js, JavaScript, Tailwind CSS, Razorpay, TMDb API* *GitHub*
- Developed a full-stack movie-booking application using **React.js**, implementing movie discovery and booking workflows.
- Integrated **Razorpay** for payment processing and **TMDb API** for dynamic movie metadata.

Uma | *Node.js, whatsapp-web.js, Puppeteer, Axios, LowDB* *GitHub*
- Developed a modular **WhatsApp automation bot** using Node.js and **whatsapp-web.js**, supporting group interactions, user profiles, media utilities, and automated responses.
- Implemented event-driven workflows for **QR authentication, group join/leave events, message handling, and client reconnection**.
- Integrated external APIs and modular services for **anime/media search, games, user interactions, and**

content automation, with persistent local data using **LowDB**.

Emotion Detection | *Python, Flask, Scikit-learn, Pandas* *GitHub*

- Developed a **Flask web application** to deploy and serve a text-based emotion detection model.
- Built classification models using **Logistic Regression** and **Support Vector Machines**, with **CountVectorizer** for text feature extraction.

Technical Skills

Languages: Java, Ruby, JavaScript, Python, C++, SQL
Backend : Ruby on Rails, Spring Boot, Spring, Hibernate, REST APIs
Frontend : React.js, Next.js, JavaScript, Tailwind CSS, Bootstrap
Databases : PostgreSQL, MongoDB
Cloud & Development : Deployment basics, CI/CD, Git, GitHub
AI/ML : AI/ML fundamentals, Scikit-learn, AI-enabled application development **Other :** IoT, Arduino, BrowserStack **Core Concepts :** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Multithreading, System Design, Software Engineering

Achievements & Recognition

- Awarded **Emerging Tech Talent** recognition by the **Vice President of PlanetSpark** for contributions during tenure.
- Solved **300+ problems on LeetCode**.
- Secured **2nd position** in the 3rd Year Student Project Expo.
- Won the **Wolfram Award**.
